

How To Import License On Gajshield Appliance

Scenario A :- The **demo license has Expired** and you wanted to upload the new license.

Access the GajShield appliance by typing <https://<GajShield LAN Interface Ip>/admin/> in browser URL.

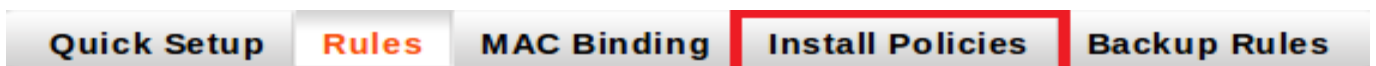

The license file downloaded in your machine, should be **uploaded** on GajShield appliance.

Click on the browse button and import the license.

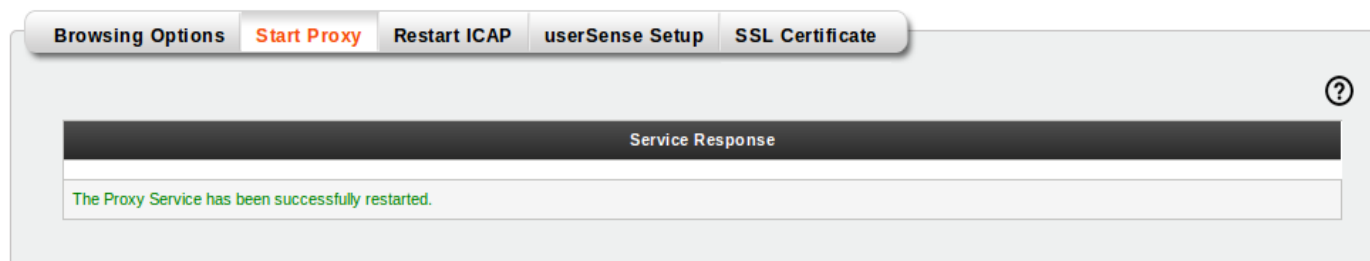

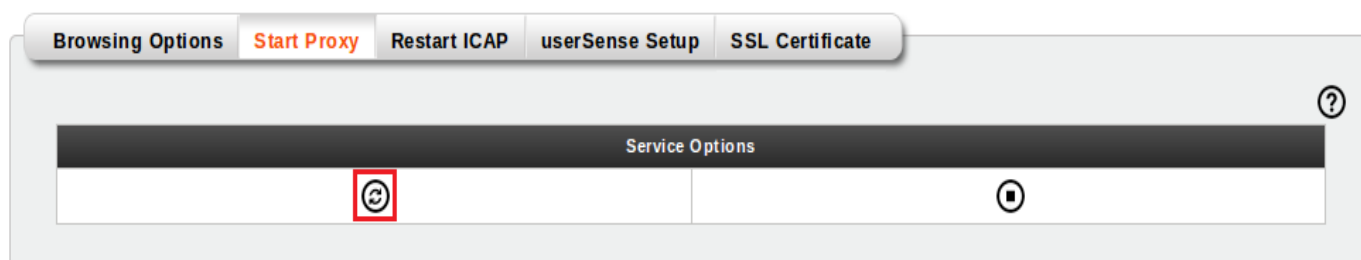

After uploading demo license on appliance please perform below steps:

Step 1: Kindly do Install policies by going to **Firewall→Policies→Rules**

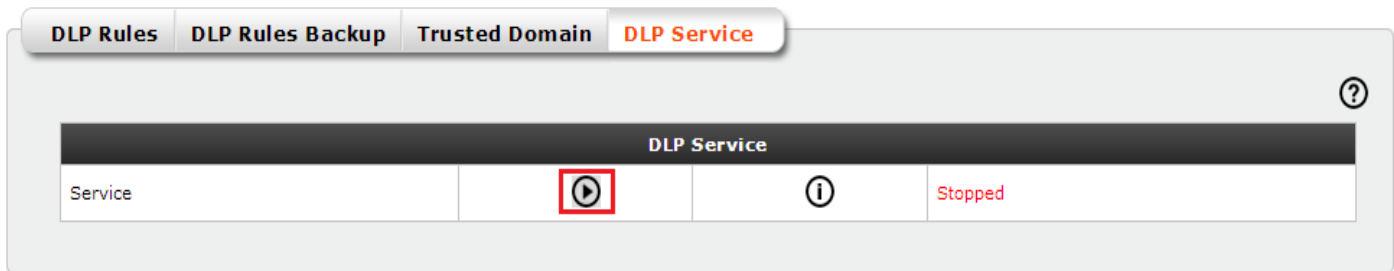

Step 2: Kindly restart the proxy service by going to **Browsing→**Setup**→**StartProxy**→Click on **Restart** button**

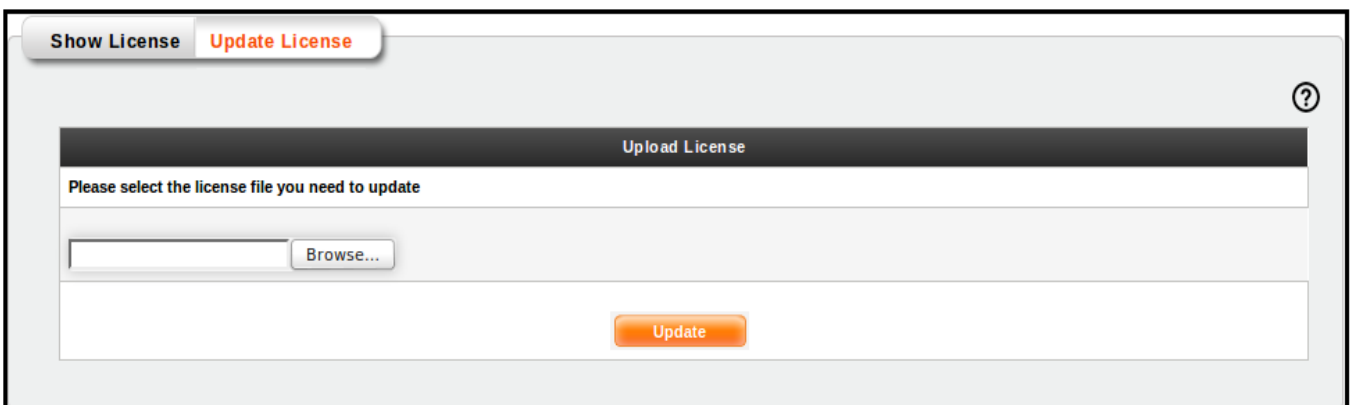

Step 3: (Optional) If DLP is configured **then only restart the DLP service by going to **DLP**→ **DLP Policies**→**DLP Service** and Click on **Start** Button.**

Scenario B :- The **Services license has Expired** and you wanted to upload the new licenses.

Access the GajShield appliance by typing <https://<GajShield LAN Interface Ip>/admin/> in browser URL.

Go to **Management**→ **License**

Click on the browse button and upload all received licenses one after one.

In **D series**, you can import license by going to **Admin**→ **License**.

After uploading the licenses **repeat** Steps 1, 2 and 3.
